Summary

I'm a BCA graduate currently working as a Full Stack Developer at Dynamic Technosoft, where I build web applications using React, Next.js, Node.js, Express.js, MongoDB, and Firebase. I enjoy putting together responsive interfaces and connecting them to well-structured APIs, and I'm always looking for ways to write cleaner, more reliable code. Right now I'm learning ASP.NET Core to get comfortable with enterprise-style development, and I'm looking for a role where I can keep learning while contributing to products that actually matter.
